<b>Tusker™</b> (Aloe 'LEO 6074')		Ivory	Large												
<b>Winter Bells™</b> (Aloe 'LEO 8521A')		Ivory	Small												

### COMMENTARY ON FLOWERING:

- 1 This timing is indicative of Queensland/NSW/NT. Flowering in other states (Vic, SA, Tas & WA ) it is likely to be up to 2 months later.
- 2 This represents the range of flowering – not every plant will be in flower during this period and a plant is more likely to be in flower in the middle of the indicated range.
- 3 A plant is likely to flower longer if older / more mature.
- 4 The first flowering season of a young aloe may vary significantly from the indicated flowering season of that cultivar at maturity (eg. differ to that shown above).
- 5 Changes in weather patterns are likely to influence flowering time (eg. early summer rain can bring this forward).
- 6 Certain cultivars (eg. Copper Shower) are able to flower twice in the indicated period.

Ⓢ All plants in the aloe-aloë collection are either protected by trademark or by the Plant Breeders Right Act 1994 as indicated by the PBR logo. A person will infringe Plant Breeder Rights if, without permission from the owner, the propagating material is reproduced, conditioned for propagation, offered for sale, exported, imported or stocked for the above purposes.
